CARBOHYDRATE RESEARCH

SUBJECT INDEX

N-Acetyllactosamine and β-D-Gal-(1 → 3)-α-D-GalNAc-(1 → O)-Bn, α-(2 → 3)- and α-(2 → 6)-sialyltransferase activities present in three variants of Ehrlich tumor cells: identification of the products derived from, 111

Acinetobacter baumannii, structure of the putative O10 antigen, 73

Aldopyranosyl ring puckering with MM3(92), modeling of, 1

(2,6-Anhydro-4,5–7-tri-O-benzyl-1-deoxy-D-*arabino*-hept-1-en-3-ulose), synthesis and spontaneous dimerization of the tri-*O*-benzyl derivative of '2-keto-1-*C*-methylene-D-glucopyranose', 141

Antigen from *Acinetobacter baumannii*, structure of the putative O10, 73

O-Antigen, 123

Arabinoxylan–protein complex isolated from rye bran, structural and molecular properties of a water-soluble, 97

Aspergillus niger, purification and properties of an exo-(1 → 3)-β-D-galactanase from, 281

Capsular polysaccharide (Zanflo) of *Erwinia tahitica* ATCC 217 11, structural elucidation, 129

Chloro-6′-deoxysucrose and immobilized isomaltulose-producing microorganisms using 2,2-dimethyl-1,3-dioxolane-4-methanol and related compounds as acceptors. Steric and chemical requirement of the glucosyl acceptor, transglucosylation with 6′-, 237

Chromobacterium violaceum NCTC 9694, the structure of the O-specific polysaccharide of the lipopolysaccharide from, 313

CMP-Neu5Ac analogue: CMP-[α-Neu5AC-(2 → 8)-Neu5Ac], synthesis of a novel, C1

(±)-Conduritol-B, improved preparation, and reaction with hydrobromic and hydrochloric acid, 147

Conformations and structure studies of sugar lactones in the solid state. Part I. The molecular structure of L-rhamnono- and L-mannono-1,4-lactones, 181

Conformations and structure studies of sugar lactones in the solid state. Part II. The molecular structure of 2-*C*-methyl-D-*ribo*-pentono-1,4-lactone (α-D-glucosaccharino-γ-lactone), 191

Crystal structure and molecular mechanics analysis of methyl 6-*O*-(*N*-heptylcarbamoyl)-α-D-glucopyranoside (HECAMEG), 161

Crystalline methyl D-xylopyranoside anomeric mixtures, high resolution solid state ^{13}C NMR study, 135

(±)-(1,3/2,4)-5-Cyclohexene-1,2,3,4-tetrol, improved preparation, and reaction with hydrobromic and hydrochloric acid, 147

Defucosylation by mercaptolysis. A potential step in analyzing branched oligosaccharides, selective, 199

2-Deoxy-α-D-*arabino*-hexosyl residues, analysis by the reductive-cleavage method of oligosaccharides containing, 293

(±)-1-Deoxy-1-halo- and (±)-1,4-dideoxy-1,4-dihalo-conduritols, synthesis and characterisation, 147

E. coli O16:K1, NMR investigation of the O16 polysaccharide, 305

Endorhamnogalacturonase-generated fragments of the backbone of rhamnogalacturonan, isolation and structural characterization of, 83

Enteric bacteria, 123

Evernia prunastri (lichen), heteropolysaccharides of, 63

Exopolysaccharide fragments, synthetic studies of pyruvate acetal-containing saccharides related to *Rhizobium*, 253

β-D-Gal-(1 → 3)-α-D-GalNAc-(1 → O)-Bn, α-(2 → 3)- and α-(2 → 6)-, sialyltransferase activities present in three variants of Ehrlich tumor cells: identification of the products derived from *N*-acetyllactosamine and, 111
Galactanase from *Aspergillus niger*, purification and properties of an exo-(1 → 3)-β-D-, 281
(α-D-Glucosaccharino-γ-lactone), conformations and structure studies of sugar lactones in the solid state. Part II. The molecular structure of 2-*C*-methyl-D-*ribo*-pentono-1,4-lactone, 191
N-Glycoproteins, synthesis of a fucosylated and a non-fucosylated core structure of xylose-containing carbohydrate chains from, 45
Glycosyl acceptor for chain extension at O-4, efficient preparation of allyl 2,3,6,2′,3′,6′-hexa-*O*-benzyl-β-lactoside and its use as a, 155
Glycosyl derivatives of *myo*-inositol 1-phosphate and 1,2-(cyclic phosphate), synthesis and possible insulin-like activity, 21
D-Gulono-1,4-lactones, a new route to some enantiomerically pure substituted morpholines from D-ribono- and, 33

D-*glycero*-D-*galacto*-Heptose, identification as a component of the O-specific antigen of *Chromobacterium violaceum* NCTC 9694, 313
Heteropolysaccharides of the lichen *Evernia prunastri*, 63

Insulin-like activity of glycosyl derivatives of *myo*-inositol 1-phosphate and 1,2-(cyclic phosphate), synthesis and, 21
myo-Inositol 1-phosphate and 1,2-(cyclic phosphate), synthesis and possible insulin-like activity of 2-amino-2-deoxy-α-D-glucopyranosyl derivatives of, 21
Isomaltulose-producing microorganisms using 2,2-dimethyl-1,3-dioxolane-4-methanol and related compounds as acceptors. Steric and chemical requirement of the glucosyl acceptor, transglucosylation with 6′-chloro-6′-deoxysucrose and immobilized, 237

'2-Keto-1-*C*-methylene-D-glucopyranose' (2,6-anhydro-4,5–7-tri-O-benzyl-1-deoxy-D-*arabino*-hept-1-en-3-ulose), synthesis and spontaneous dimerization of the tri-*O*-benzyl derivative of, 141

β-Lactoside and its use as a a glycosyl acceptor for chain extension at O-4, efficient preparation of allyl 2,3,6,2′,3′,6′-hexa-*O*-benzyl-, 155
Lichen *Evernia prunastri*, heteropolysaccharides of, 63
Lipopolysaccharide, 123
Lipopolysaccharide component produced by a symbiotically defective mutant of *Rhizobium leguminosarum* biovar *viciae*, structure of the unusual trisaccharide, 271

L-Mannono-1,4-lactones, conformations and structure studies of sugar lactones in the solid state. Part I. The molecular structure of L-rhamnono- and, 181
Mercaptolysis. A potential step in analyzing branched oligosaccharides, selective defucosylation by, 199
Methyl 6-*O*-(*N*-heptylcarbamoyl)-α-D-glucopyranoside (HECAMEG), crystal structure and molecular mechanics analysis of, 161
MM3(92), modeling of aldopyraosyl ring puckering with, 1
Modeling of aldopyranosyl ring puckering with MM3(92), 1
Molecular mechanics analysis of methyl 6-*O*-(*N*-heptylcarbamoyl)-α-D-glucopyranoside (HECAMEG), crystal structure and, 161
Morpholines from D-ribono- and D-gulono-1,4-lactones, a new route to some enantiomerically pure substituted, 33
Mucin-type core unit, synthesis of neoglycolipids containing a, 209

Neoglycolipids containing a mucin-type core unit, synthesis, 209
NMR investigation of the structure of the O16 polysaccharide from *E. coli* O16:K1, 305
NMR spectroscopy, 123

Oligosaccharide components of the core structure of N-glycans, synthesis of, 45
Oligosaccharides containing 2-deoxy-α-D-*arabino*-hexosyl residues, analysis by the reductive-cleavage method, 293

D-*ribo*-Pentono-1,4-lactone (α-D-glucosaccharino-γ-lactone), conformations and structure studies of sugar lactones in the solid state. Part II. The molecular structure of 2-*C*-methyl-, 191
Polysaccharide from *Acinetobacter baumannii*, structure of the putative O10 antigen, 73
O16 Polysaccharide from *E. coli* O16:K1, NMR investigation of the structure, 305
Polysaccharide of the lipopolysaccharide from *Chromobacterium violaceum* NCTC 9694, the structure of the O-specific, 313

Polysaccharide Zanflo elaborated by *Erwinia tahitica* ATCC 217 11, structural elucidation, 129
Pyruvate acetal-containing saccharides, synthetic studies, 253

Reductive-cleavage method, analysis of oligosaccharides containing 2-deoxy-α-D-*arabino*-hexosyl residues by the, 293
Rhamnogalacturonan, isolation and structural characterization of endorhamnogalacturonase-generated fragments of the backbone of, 83
L-Rhamnono- and L-mannono-1,4-lactones, conformations and structure studies of sugar lactones in the solid state. Part I. The molecular structure of, 181
α-L-Rhamnopyranoside, conformational features of rhamnopyranose derivatives. The molecular structure of methyl 2,3,4-tri-*O*-acetyl-, 173
Rhizobium-related exopolysaccharide fragments, synthetic studies of pyruvate acetal-containing saccharides, 253
D-Ribono- and D-gulono-1,4-lactones, a new route to some enantiomerically pure substituted morpholines from, 33
Rye bran, structural and molecular properties of a water-soluble arabinoxylan-protein complex, 97

Selective defucosylation by mercaptolysis. A potential step in analyzing branched oligosaccharides, 199
Sialyltransferase activities present in three variants of Ehrlich tumor cells: identification of the products derived from *N*-acetyllactosamine and β-D-Gal-(1 → 3)-α-D-GalNAc-(1 → O)-Bn, α-(2 → 3)-and α-(2 → 6)-, 111
Solid state ^{13}C NMR study of crystalline methyl D-xylopyranoside mixtures, 135
Structure and taste of 4,4′6,6′-tetrachloro-4,4′,6,6′-tetradeoxy-α,α-*galacto*-trehalose, 319
Structure of methyl 2,3,4-tri-*O*-acetyl-α-L-rhamnopyranoside, conformational features of rhamnopyranose derivatives. The molecular, 173
Structure of the unusual trisaccharide lipopolysaccharide component produced by a symbiotically defective mutant of *Rhizobium leguminosarum* biovar *viciae*, 271
Structure studies of sugar lactones in the solid state. Part I. The molecular structure of L-rhamnono- and L-mannono-1,4-lactones, conformations and, 181
Synthesis and spontaneous dimerization of the tri-*O*-benzyl derivative of '2-keto-1-*C*-methylene-D-glucopyranose' (2,6-anhydro-4,5–7-tri-O-benzyl-1-deoxy-D-*arabino*-hept-1-en-3-ulose), 141
Synthesis of a novel CMP-Neu5Ac analogue: CMP-[α-Neu5AC-(2 → 8)-Neu5Ac], C1

Tetrachloro-4,4′,6,6′-tetradeoxy-α,α-*galacto*-trehalose, structure and taste of 4,4′,6,6′-, 319
Transglucosylation with 6′-chloro-6′-deoxysucrose and immobilized isomaltulose-producing microorganisms using 2,2-dimethyl-1,3-dioxolane-4-methanol and related compounds as acceptors. Steric and chemical requirement of the glucosyl acceptor, 237
Transition metal–saccharide interactions: synthesis and characterization of vanadyl saccharides, 227
Trisaccharide lipopolysaccharide component produced by a symbiotically defective mutant of *Rhizobium leguminosarum* biovar *viciae*, structure of the unusual, 271

Vanadyl saccharides, transition metal–saccharide interactions: synthesis and characterization of, 227

Water-soluble arabinoxylan–protein complex isolated from rye bran, structural and molecular properties, 97

Xylose-containing carbohydrate chains from N-glycoproteins, synthesis of a fucosylated and a non-fucosylated core structure, 45

Zanflo, structure of the capsular polysaccharide of *Erwinia tahitica* ATCC 217 11, 129
